Function in Permeable Metals

Compliance Principles

Compliance Principles

Introduction

Lawful and Responsible Behaviour

In our business of creating quality in processes and products for our customers all our activities are based on the values of filtertechnik.Europe GmbH & Co. KG (fteu®) and the fteu® Group as cornerstones of how we conduct business.

Free Market and Competition

On that basis we follow Compliance Principles that are guidelines and foundational requirements for allowing activities to be consistently aligned with our values.

Communication and Development

Along the entire value chain of our processes, including our suppliers and partners, we seek to uphold these cornerstones and specifically require the adherence to our Compliance Principles.

Health, Safety and Environment

With our partners we deem this a prerequisite to work together effectively and sustainably for processes and products of quality.

A handwritten signature in blue ink, appearing to read 'N. Komorek'.

Dr. Nicolas Komorek

Heinsberg, 16 April 2019
